

**Kino**  
**by Scott Pfitzinger**  
**for any number of people**

**Preparation:** Laptop and projector to be set up so musicians and audience can see the video (musicians may have their backs to the audience). YouTube video preselected and loaded on the laptop for quick playback (audio muted).

**Directions:** Musicians improvise while watching a preselected YouTube video, using the following guidelines:

- The busier (more active) the video, the faster the note changes (busy video = busy music)
- The warmer the predominant color, the louder the dynamics (whites and blues = quieter, earth tones = medium, reds = louder)
- Notes improvised based on the content of the video

**Duration:** Approximately 2-5 minutes
